Projects

CouKart - A marketplace for selling and buying coupons
CouKart is an AI based online marketplace that enables users to buy and sell unused coupons, ensuring that discounts are maximized instead of wasted. It benefits sellers by allowing them to earn from unwanted coupons and buyers by offering great deals at reduced prices, creating a smart and efficient savings ecosystem. It was built using HTML, CSS, JavaScript, Node JS. I deal with front end of the project.

Calorie Tracker Web App
A lightweight web application to monitor food items and calories with input validation, total calculation, and data persistence in localStorage. Created a minimalist, responsive UI. It was built using HTML, CSS, JavaScript, LocalStorage.

An automated Chat bot
The chat bot answers according to the data which is previously given to it. It was built using the UiPath Studio.

Courses and Certificates

Java programming fundamentals
Infosys springboard

Ethical Hacking
NPTEL - swayam

Programming essentials in C
Cisco netacad

Programming essentials in Python
Cisco netacad

UiPath Automation tools training
UiPath academy

Introduction to Cyber security
Cisco netacad

SQL (intermediate)
HackerRank

Workshops and Hackathons

Gemini flash 2.0 workshop
l4g technologies, VRSEC

HTML, CSS and JavaScript bootcamp
Virtual bootcamp by Lets upgrade

GDG solution challenge Hackathon (winner)
Google Developer Groups (GDG) at VRSEC

Tech Winter Break - Flutter:The future of app development workshop
Google Developer Groups(GDG) at VRSEC

UI path Hack-a-bot Hackathon
UI path community, VRSEC

Languages

- English
- Telugu
- Hindi

Declaration

I affirm that the information provided above is accurate and truthful to the best of my knowledge and belief
